school guidance counselor!**

## **Middle School After School Programs at the River Valley Technical Center**

**All Programs not designated are 4 weeks long and offered on Thursdays 3/25, 4/1, 4/8, and 4/15.**

**Digital Design:** 3D Abstraction! Learn how to take cool pictures of patterns, shapes, unrecognizable objects, reflections, nature and people. Then transform your 2D photographs and project them into 3D space using Adobe Photoshop. Take home a professional print in a frame to show off your awesome skills you learned in the Digital Design class at RVTC.

**Wood Working:** Are you interested in carpentry? Do you want to learn to use power tools? Then come and build some projects using hand and power tools in the RVTC Carpentry lab! This session is 3 weeks long (it may be expanded to 4) and runs on 3/25, 4/1, and 4/8.

**Television Production:** Want to be part of a LIVE New Production? The RVTC MS News Program is seeking students to be part of our team. Come learn how to use cameras, edit video, and run a LIVE style television show. Whether you want to be on screen as a news anchor or learn the jobs that go on behind the scenes this program is the choice for you. Two students from a school must be signed up in order for a school to participate.

**Firefighting and EMT intro:** This is a 4 week session that will give students the opportunity for some hands on experience with firefighting and EMT training! The sessions may include a trip to the fire station in Springfield.

**Horticulture Flowers and Plants:** Work in the greenhouse of the tech center's horticulture department for this 2 week session! In these two hands on sessions students will have an introduction to flower arrangements and the greenhouse industry. Students will work with flowers and greenhouse plants to create an arrangement or two that they can take with them. This is offered 4/8 and 4/15.
